REPORT

OFFICE OF COMPTROLLER-GENERAL,

ATLANTA, GA., January 1, 1923.

To His Excellency, THOMAS W. HADWICK, Governor.

SIR: In compliance with law I have the honor to submit the annual report of this department for the fiscal year ending December 31, 1922, showing by tabulated statements the sources from which the revenue of the State is derived, the appropriations made by the Legislature for the fiscal year 1923, and the receipts and disbursements from January 1st to December 31st, 1922.

Since the date of the last annual report of this department, January 1st, 1922, to December 31st, 1922, the State Treasurer has received and certified to this office, and my official vouchers have been duly issued for \$12,889,801.22. Executive and other warrants under the general and the several special appropriation acts amounting to \$12,984,534.82 have been audited by me and paid by the Treasurer for the same period, and his account credited there with. The condition of the treasury therefore on January 1st, 1923 was as follows:

Balance in Treasury, January 1, 1922-----	\$ 1,727,866.35
Receipts from all sources from January 1,	
1922 to January 1, 1923-----	12,889,801.22

Total amount to be accounted for---	\$14,617,667.57
Executive Warrants paid by Treasurer----	\$12,863,799.78
Warrants President of Senate and Speaker of	
House -----	120,735.04
Total payments by Treasurer-----	\$12,984,534.82

Balance in Treasury January 1, 1923--

\$ 1,633,132.75

It should be stated that in this balance of \$1,633,132.75 is included \$100,000 of the sinking fund, which by the terms of the Constitution can only be used for retiring the principal of the public debt. The total bonded debt of the State at the time of the adoption of this sinking fund provision of the Constitution was \$10,644,500.00, and annual interest thereon amounted to \$719,135.00. Under this wise plan of retiring annually a part of the public debt the aggregate has been reduced to \$5,485,202. This includes the debt due the State University and the Land Script Fund. By the funding of most of this debt at much lower rates the interest charge on the bonded debt has been reduced to \$226,090, exclusive of the interest on the debt due the State University and the Land Script Fund, separate appropriations being made to cover these charges. We have therefore made a reduction of \$5,159,298 in the principal of the bonded debt, and our annual interest account has been reduced \$493,045. It must be stated, however, that the proceeds of the sale of certain property of the State have been applied to the extinguishment of a part of the debt—which is also required by the Constitution of 1877. The balance of this bonded debt is secured by the State's immensely valuable property, the Western & Atlantic Railroad, estimated to be worth \$20,000,000.

For your information I submit a carefully prepared *estimate* of the revenue of the State for 1923, together with a statement of the appropriations made for 1923. You will note the omission of \$540,000 annual rental of the Western & Atlantic Railroad, from the estimated revenue. In 1921 the Legislature provided for the discounting of the rental warrants for a period of five years, which eliminates the W. & A. rental from the annual revenue of the State for said period.

The General Tax Act effective January 1, 1922, imposed a poll tax of \$1.00 "upon each and every inhabitant of the State between the ages of 21 and 60 years". This was amended in 1922 so as to provide that poll tax shall not be required or demanded of female inhabitants of the State who do not register for voting. The increase in revenue which it was anticipated the State would receive from this source was materially reduced by the change referred to.

	<hr/>
	\$455,340.85

In estimating the revenue for 1923 a tax rate of five (5) mills has been used, this being the limit fixed by the Constitution. On this basis we estimate that \$5,604,122.26 will be raised from ad valorem taxes, and \$3,934,197.00 from special taxes and other sources, making the total estimated revenue for 1923 \$9,538,319.26. The estimated revenue for 1923 is based upon the valuations of 1922,

and is predicated upon the idea that the valuations of property for 1922 will be maintained in 1923.

While it would appear that the estimated revenue for 1923 is \$248,392.26 in excess of appropriations, it must be borne in mind that no provision has been made for the payment of pensions in pursuance of the amendment of the Constitution of 1918, for either the year 1922, or 1923. I am informed by the Commissioner of Pensions that according to his estimate it will require an additional appropriation of \$1,109,015 for 1922, and \$1,469,000 for 1923, to complete the payment of pensions due for these years under existing laws. Funds to meet this deficiency should be provided for by the Legislature at its approaching session.

BUDGET COMMISSION

At its session in 1922 the Legislature passed a bill creating a State Investigating and Budget Commission, to be composed of the Governor, the Comptroller General, the Attorney General, and the Chairman of the Ways and Means and Appropriation Committees of the House and of the Senate. All State departments, bureaus, institutions, commissions, and officers receiving appropriations from the State, are required to furnish the Budget Commission with an estimate in itemized form of the amount of money needed for their respective wants for the biennial period beginning with the session of the General Assembly in 1923. As a part of this report they are required to furnish a statement showing the total amount of appropriations they have received for each of the three fiscal years preceding the filing of such report; an itemized report of all expenditures; the number of persons employed, the salary of each, and such other itemized report as will put in the possession of the Commission a full and complete itemized statement of receipts and disbursements for the fiscal year preceding the filing of such report. The data which this Commission is directed to gather and submit to the General Assembly at the 1923 session should be of invaluable service to that honorable body in the preparation of the appropriation bill for 1924 and 1925.

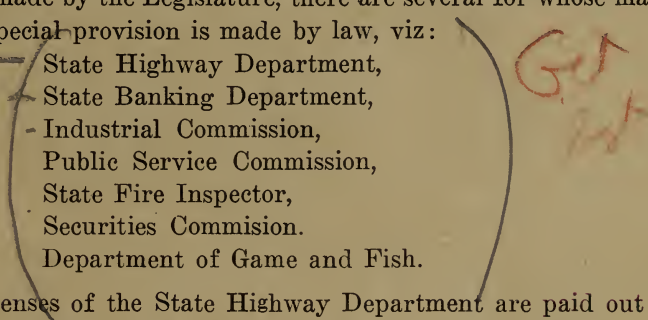

The Act creating the State Investigating and Budget Commission devolves a large work upon it in the preparation and sending out of blanks to "each department, institution, commission, bureau and officer of the State" and in preparing from such reports a

budget to be submitted to the Legislature. No provision is made for clerical or any other expenses incurred by the Commission in carrying out the requirements of the law. I therefore suggest that an appropriation of not less than \$2500 be made for the expenses of the Budget Commission.

DEPARTMENTS MAINTAINED UNDER SPECIAL ACTS

In addition to the departments and commissions of the State government for whose support and maintenance direct appropriations are made by the Legislature, there are several for whose maintenance special provision is made by law, viz:

State Highway Department,
State Banking Department,
- Industrial Commission,
Public Service Commission,
State Fire Inspector,
Securities Commission.
Department of Game and Fish.

All expenses of the State Highway Department are paid out of the Motor Vehicle Fees collected by the Secretary of State. ✓

The State Banking Department is authorized to collect fees for the examination of Banks, which go to the support of the Department.

The Industrial Commission collects a tax of 1% on the gross earnings of insurance companies writing Workmen's Compensation business, out of which all its expenses are defrayed.

The Act of 1922 creating the Public Service Commission provides that \$70,000 shall be raised annually for its support by fees collected from the public service corporations coming under the jurisdiction of the Commission. The amount of the fee is based upon the valuation at which the property of the corporation is returned for taxation, and the present law requires the fee assessed and collected by the Comptroller General. I would suggest that this be amended so as to allow the Commission to assess and collect these fees, as is done in the case of the Banking Department and the Industrial Commission, the assessments to be made upon a statement to be furnished by the Comptroller General of the assessed value of all public service corporations required by law to make their tax returns to him.

The State Fire Inspector, who is attached to the office of the Insurance Commissioner, is supported by a tax of not more than one-tenth of 1% on premiums of fire insurance companies doing business in this State, which is assessed and collected by the Insurance Commissioner.

The Securities Commission, of which the Secretary of State is Chairman, is authorized by law to employ examiners, clerks and stenographers. All salaries and expenses are paid out of funds arising from the collection of licenses and fees from corporations coming under the jurisdiction of said Commission.

The Department of Game and Fish. The expenses of this department are paid out of licenses and fines collected under the law providing for the regulation of hunting and fishing. Any funds collected, over and above the expenses of the Department, are required to be paid into the State Treasury.

I desire to renew my recommendation that the Legislature require all revenue of the State, from whatever source derived and collected, paid into the treasury, and all expenses of government, and of every department of the government, paid out of this general fund by warrant of the Governor drawn on appropriations duly made by the Legislature. This will relieve much confusion in the keeping of accounts by the bookkeeping department, and would at a glance show to the people of the State the cost of every branch of the government maintained by the State. This I consider very important, inasmuch as both the revenue of the State and the expense of government are increasing each year, and the people of Georgia should be advised in detail of the cost to them of maintaining the different public institutions and governmental departments.

In order that it may be seen to what extent the assessments of the taxable property of the State have increased, I have prepared in tabular form this data beginning with the year 1880, and bringing the figures down to 1923. The general property of the State is required by law to be returned for taxation to the receivers of tax returns of the several counties, and entered on their respective digests, while the property and franchises of all public utility corporations, is made returnable to the Comptroller-Gen-

eral. The value of the property returned to the tax receivers and that returned to the Comptroller-General is given separately and also the rate of taxation levied by the State for each of said years.

It will be observed that notwithstanding the continued increase in the assessed value of the property of the State and the consequent large increase in the revenue derived annually from these increases, the appropriations made by the Legislature each year have absorbed the additional revenue, rendering it impossible to reduce the tax rate. Up to 1903, when the Constitutional limit on the State tax rate went into effect, the rate steadily increased, regardless of the enhancement of the value of property and the consequent increase in the revenue.

While the State tax rate is limited to five mills there is no limitation on the rate which may be levied by counties. Thus when additional revenue is required by a county the tax rate is increased, instead of the assessment of property. By this method the county raises the additional revenue needed without giving the State the benefit of the slightest increase in revenue. If this system is permitted to continue the State will be starved while the counties can raise what they desire. If you will refer to Table No. 1 (b) of this Report, found on page No. 33, you will note that the average county tax rate in 1900, was 5.65 mills, while in 1922 the average was 14 mills. I am informed that a bill will be introduced at the approaching session of the legislature limiting the amount of the county levy. I earnestly recommend the passage of some legislation looking to the correction of this growing evil, in order that the State may receive its just and fair revenue from ad valorem taxes.

YEAR	Property on Digest	Railroad Property, Tel., Tel., Ex., etc.	Total	Tax Rate State

1919-----	982,800,863	163,016,189	1,145,817,052	5 "
1920-----	1,181,473,058	165,409,623	1,346,882,681	5 "
1921-----	1,102,210,966	165,701,724	1,267,912,690	5 "
1922-----	1,027,794,721	164,975,361	1,192,770,082	5 "

The above table covers a period of forty-three years. During this time the value of property on the tax digests has increased from \$238,934,126 to \$1,027,794,721, or approximately 430%. The value of public service corporations for the same period has increased from \$12,490,525 to \$164,975,361, or approximately 1313%.

The valuation of corporate property returned to the Comptroller-General for taxation for the year 1922 does not embrace all of such property in the State. Under charters granted by the State there are three railroads claiming exemptions from ad valorem taxation, the Georgia Railroad & Banking Company, the Southwestern and the Augusta & Savannah. Besides these exempted lines we have the State's road, the Western & Atlantic. The value of none of these roads is included in the table above, but they are worth in my judgment not less than fifty million dollars, the revenue from which, if these roads were taxed like other railroads, would amount to \$250,000, thus increasing the revenue received from taxation of public utility corporations by this amount.

Among public service corporations are a *very large number of very small local telephone properties*, which are increasing annually in number but not in value. Some of them are incorporated, but quite a number of them are not. Most of them have been cheaply constructed by the co-operation of the farmers in the territory through which they run, solely for their convenience, and not for making money, and are therefore of no value except as a convenience to the families of the farmers. I WOULD EARNESTLY URGE THAT THE LAW BE AMENDED IN RESPECT TO THE RETURN OF THESE PROPERTIES FOR TAXATION, SO AS TO REQUIRE THEM RETURNED TO THE TAX RECEIVERS AND TAXES PAID TO THE TAX COLLECTORS, THEY BEING PURELY LOCAL IN CHARACTER, and the local officers being familiar with the character and value of these properties. This would also relieve the Comptroller-General's office from much detailed work, from which little revenue is derived, and the time thus saved could be given to other subjects, from which far greater results in the way of revenue for the State could be obtained.

STATEMENT SHOWING INCREASES IN VALUATION IN SOME OF
THE CHIEF ITEMS OF PROPERTY IN GEORGIA FOR
1880, 1921, AND 1922.

	1880	1921	1922
City and Town Real Estate-----	\$49,007,286	\$364,678,716	\$368,194,459
Improved and Wild Lands-----	90,493,822	334,731,192	308,140,959
Live Stock-----	21,017,634	46,347,157	35,523,038
Farm Implements -----	2,971,372	11,752,761	9,109,113
Household Furniture -----	9,156,404	39,551,047	36,405,809
Merchandise -----	12,012,755	71,364,790	61,095,387
Money, etc. -----	29,333,736	68,925,022	58,527,469
Cotton and Other Factories ----	1,640,000	66,098,017	64,289,272
Iron Works -----	295,640	1,605,216	1,338,149
Bank Capital (including Surplus)	4,667,567	47,611,593	43,532,793
Railroad and other Corporations--	9,866,129	165,701,724	164,975,361

I have also compiled a comparative statement of the assessments of the property of colored tax payers of the State beginning with the year 1880, in 5 year periods, from which it will be observed that this class of our people has rapidly acquired property until it has reached the sum of \$51,275,682.

STATEMENT OF PROPERTY IN 5-YEAR PERIODS RETURNED BY
COLORED TAXPAYERS FROM 1880 TO 1922

1880 -----	\$ 5,764,293
1885 -----	8,153,390
1890 -----	12,322,003
1895 -----	12,941,230
1900 -----	14,118,720 --
1905 -----	20,616,468
1910 -----	32,233,985
1915 -----	38,821,699
1920 -----	68,628,514
1921 -----	59,224,487
1922 -----	51,275,682

TAX COLLECTORS AND TAX RECEIVERS

I desire to say that, with a few exceptions, these officials have discharged their duties faithfully and efficiently, and are entitled to the commendation of this department, under the direction of which they enforce the tax laws of the State. The Act of August, 1917, defining and regulating the duties of tax collectors of this State and imposing penalty for violation of same, has

resulted in more prompt payment of taxes by the tax payers and more prompt settlements by tax collectors, thereby placing the funds of the State in the treasury earlier than has been the case since the decision of the Supreme Court holding that Section 1189 of the Code, prohibiting judicial interference with Comptroller-General's executions, was violative of the 14th amendment of the Constitution of the United States.

The enforcement of the Act of 1917 has been seriously impeded by the failure of levying officers to enforce promptly executions issued by tax collectors and placed in their hands for collection, there being no penalty provided by this act for the failure of levying officers to make settlements with tax collectors. This has rendered it impossible in very many cases for tax collectors to make settlements by April 20th, the time limit fixed by the statute. I therefore suggest that as tax collectors are penalized to the extent of one-fourth of their commissions for failure to make settlement, the law be amended so as to centralize fully authority and responsibility in the tax collectors by passing an act making tax collectors ex-officio sheriffs for the levy of fi. fas. issued against delinquent tax payers. This has been done in Fulton County and has greatly expedited settlements by the tax collector.

The difficulties which the tax collectors have encountered have been further increased by the financial stringency prevailing throughout the State for the last three years. This deplorable condition is largely the result of the ravages of the boll weevil, which in some sections have entirely destroyed the cotton crop. In these counties the payment of taxes has been greatly delayed, and if these conditions continue the revenue of the State will be very largely decreased.

TAX COLLECTORS' BONDS.

In this connection I desire to suggest that in view of the large increase in the revenue of the State collected by tax collectors, growing out of the increases in the assessment of property, whereby greater responsibility is devolved upon tax collectors and their securities, the Legislature pass an act which will require all State and county tax collectors to make bond through fidelity or surety companies, instead of giving personal bonds. The premium charged for these bonds is small in most instances, compared with

the compensation received by these officers and the bond should be fixed at the amount of the tax to be collected instead of one-third more, as now required. This would expedite the enforcement of *fi. fas.* issued by the Comptroller-General against defaulting tax collectors, and would avoid the embarrassment of having to proceed against private individuals who had become surety on the bonds of tax collectors through friendship, receiving no compensation for same. A further advantage growing out of this requirement would be less litigation and delay of the courts in enforcing *fi. fas.* issued by this department.

ANNUAL AUDIT OF COLLECTORS' ACCOUNTS.

Another recommendation which I think wise under existing circumstances is that all tax collectors' accounts should be audited every year, under the direction of the county commissioners, the expense of the audit being borne by the State and county in proportion to the amount of tax collected for each. To do this would in my judgement protect tax collectors from loss by reason of errors in calculation of the taxes of the State and county, and would greatly aid them in keeping their records straight, and would insure the payment of State taxes which are frequently collected after tax *fi. fas.* have been issued and returned *nulla bona*. I might add by way of illustration that in a county recently audited, it was shown that a large sum had been collected by county authorities on *fi. fas.* which were entered as *nulla bona*, and all of which was paid into the county treasury, instead of the State's part being remitted to the State Treasurer. The audit I suggest would protect the State's interest in all such cases, and would seem to be worthy of consideration.

FEE REPORTS.

Under the Act approved August 17, 1912, which went into effect January 1, 1913, requiring quarterly reports filed with the Comptroller-General by all State and County officers receiving fees, commissions or compensation other than salaries, the Legislature now has in its hands information covering receipts for the four quarters of 1913 to 1922, of all State and county officers who have filed reports. With these reports before them the Legislature has the information which it sought to secure, and I therefore urge

that the purpose of the Act having been accomplished, it be repealed. To allow it to remain on the statute books as a continuing Act would serve no good purpose, and would impose additional duties upon the officers affected thereby, as well as upon the office of the Comptroller-General and if printed involves heavy expense on the part of the State in the matter of incorporating these voluminous reports in the House and Senate Journals.

STATE REVENUE LAWS.

The matter of the revision of the State's revenue laws was given very careful consideration by the Legislature of 1919-1920. Under a resolution of the House and Senate of 1918 a Joint Committee was appointed to investigate the defects of our present laws and report a bill to the 1919 session for such amendments as would provide the needed remedy. The bill proposed by the Committee recommended far-reaching changes which would practically have revolutionized our system of taxation. It provided for a constitutional amendment repealing the ad valorem and uniformity provisions of the present constitution, and for the adoption of a system providing for classification and segregation of property. This measure was referred to its appropriate committee and a number of hearings held, but was not acted on before adjournment.

In my annual report of 1919 I strongly advised against so radical a change in our system of taxation and suggested that instead we endeavor by appropriate legislation to correct the defects in the present system. Since making that suggestion I have given much thought and study to the subject and am more strongly convinced than ever that were the machinery recommended for the new system applied to the existing system of taxation, it would accomplish better results without the destruction of the system which has been successfully in operation since the adoption of the constitution of 1877. The ad valorem and uniformity scheme of taxation falls equally upon all of the property owners of this State, and requires all citizens of the State to contribute to the support of the government in proportion to the amount and value of the property of each. What could be fairer to all classes of people than this method of taxation?

STATE FINANCES.

The State's financial system is so intimately connected with the subject of taxation that I deem it proper to make answer to some criticisms which have been continuously made of the financial condition of the State, which appear to be based either upon misinformation or lack of information.

The difficulties experienced both by the present Governor and his predecessors in office in making prompt payment of large appropriations, is largely due to the fact that none of the ad valorem taxes levied for the support of the State Government for the fiscal year is collected until late in the fall. In fact the bulk of these taxes is not remitted to the State Treasurer until after December 31st, whereas the appropriations for said fiscal year begin on the first day of January, over nine months before any revenue whatever is derived from taxes on property for the current year. These large appropriations, such as schools and pensions which absorb over two-thirds of the total revenue of the State, are demanded during the first three months of the year, when as a matter of fact there is little of the State's revenue for the current year in the treasury to meet such demands upon it, the balance in the State Treasury on the first day of January being applicable to payment of appropriations for the previous year. This method of financing the State is made necessary by the fact that Georgia is essentially an agricultural State, and the crops, from the sale of which both the farmers and merchants depend for funds with which to pay taxes, are not marketed until the fall of the year. The statements which have been made from year to year that the State was not raising sufficient revenue to meet its appropriations, were without foundation prior to the year 1921. The regular appropriations for 1921 and the extra appropriations made in the summer of that year, amounted to \$10,944,957 against an estimated revenue of \$9,822,645. To meet this deficiency the Legislature authorized the discounting of the Western & Atlantic Railroad rental for a period of five years, from the proceeds of which all 1921 appropriations, including the schools and additional pensions, were paid as they fell due. No funds have been provided, however, to meet the increase in the pension roll, under the constitutional amendment of 1918, for either 1922 or 1923. As stated else-

where in this report the Commissioner of Pensions estimates that it will take an appropriation of \$1,109,015 to complete the payment of 1922 pensions, and that the \$1,250,000 appropriated for the payment of 1923 pensions will leave approximately \$1,469,000 due and unpaid. The legislature at its approaching session therefore faces the task of raising \$2,578,000 additional revenue in 1923 if the pensions due under existing statutes are to be paid Confederate veterans and widows for the years 1922 and 1923.

CLERICAL FORCE.

It will doubtless be a source of surprise to you to learn that there has been no increase made by the Legislature in the clerical force of the Comptroller-General's office in over forty years. The Comptroller-General as you know is the head of the Tax Department of the State, and his office is the bookkeeping department for the entire State. He is required to keep account with every tax collector in Georgia and of every dollar that comes into or goes out of the State Treasury. In 1877 the Constitution provided for two clerks in the Comptroller's office. The same provision stands to-day. Additional duties have been devolved upon these clerks, and provision made for some additional compensation, but not for any additional help. I am sure that the mere statement of this fact will be sufficient to call your attention to the urgent need of another clerk. I recommend that the Legislature create this additional clerkship, and provide a salary adequate to obtain the class of trained service required.

In conclusion I desire to express my appreciation of the hearty co-operation of the Governor in all matters pertaining to the collection and disbursement of the revenue of the State. My thanks are also due my office force for the efficient and loyal manner in which they have performed all duties devolved upon them.

Respectfully submitted,

WM. A. WRIGHT,
Comptroller-General.

TABLE NO. 1

Showing Receipts and Disbursements for Year 1922.

RECEIPTS	1921	1922
To Balance in the Treasury.....	\$1,024,801.15	\$1,727,866.35
